Corn and soybean production in the north central United States is highly dependent on favorable temperatures and appropriate precipitation patterns, making this industry vulnerable to changes in climate patterns.

Objectives

1. Use existing data and models to better understand the contributions of anomalous weather to crop variability and implications for future management options.
2. Understand the use and value of climate information for agricultural decision making, and determine effective methods for disseminating usable climate knowledge.
3. Develop tools, training materials, and implementation approaches that lead to more effective decision making and the adoption of climate-resilient farm practices.
4. Evaluate the effectiveness of decision support tools and materials in four pilot states, refining resources as needed based on stakeholder feedback.
5. Broadly disseminate validated decision support resources and extension programs across the Corn Belt.

Key activities (2011-2013)

- Develop gridded crop model outputs for the Corn Belt using historical data 1981-2010
- Identify impacts of climate and management decisions on yields and farm profitability
- Survey producers and advisors about climate change perceptions and information needs
- Determine how climate information flows through agricultural communities

A Foundation For Success

The U2U team is a diverse and uniquely qualified group of faculty, staff, and students from nine universities across the Corn Belt. Team members are experts in applied climatology, crop modeling, agronomy, cyber-technology, economics, and social science.

Ongoing engagement of key stakeholders is at the core of this project and highly critical to its success. Agricultural producers, advisors, and extension educators play an important role in the co-production of science.

Project Collaborators

Purdue University: Linda Stalker Prokopy* (Lead), Corinne Alexander, Larry Biehl, Stuart Carlton, Otto Dearing, Bruce Ericksen*, Ani Ellas, Sajeev EMM, Patrick Freeland, Ben Gramig*, Olivia Helmer, Anil Kumar, Xing Liu, Amber Saylor Mase, Dev Niyogi*, Paul Preckel, Carol Song*, Melissa Widhalm, Lan Zhao
Iowa State University: Roger Elmore*, Chad Hart*, Ani Ellas, Lois Wright Morton*, Eugene Takie*, Adam Wilke
Michigan State University: Gopal Nagarsharmi, Jeff Andresen*, Jim Hilker
South Dakota State University: Dennis Tody*
University of Illinois: Jim Angel*, Beth Hall, Steve Hilberg*, Atul Jain*
University of Michigan: Yun-Jia Lo, Maria Carmen Lemos*
University of Missouri: Pat Guinan*, Ray Massey*
University of Nebraska-Lincoln: Juliana Dai, Tonya Haigh, Cody Knutson*, Tapan Pathak, Martha Shutski*
University of Wisconsin: Tom Blevins*, Jenna Klink, John Kriva, Rebecca Power
*denotes co-project investigator
